

### REMARKS

By this Preliminary Amendment applicant has amended the specification by incorporating appropriate section titles. An Abstract of the Disclosure has also been added. The added abstract is supported by the abstract of the International Application to which the present national application claims priority. A copy of the abstract is also attached hereto on a separate sheet of paper. Original claims 1-15 have been cancelled and new claims 16-19 have been added. Applicant respectfully submits that new claims 16-19 are supported by the claims as originally filed. In view of the foregoing, applicant respectfully submits that the amendments to the specification and the claims do not introduce new matter, and entry thereof is respectfully requested.

Based on the above, claims 16-19 are presented for the Examiner's consideration on the merits.

DATED this 10<sup>th</sup> day of September 2004.

Respectfully submitted,

DANA L. TANGREN  
Attorney for Applicants

## ABSTRACT OF THE DISCLOSURE

A lighting unit includes one or more lamps, a motor configured to adjust the position of the lamps, a controller configured to transmit drive signals to the motor in dependence on received signals and, for each of the lamps, a corresponding light detector connected to the controller such that receipt of modulated light at one of the light detectors gives an indication to the controller that the position of the corresponding lamp is to be adjusted. Used with the lighting unit is a remote-control unit, by way of which the user can, firstly, emit the modulated light, preferably laser light, to select the lamp to be moved and, secondly, emit a coded infrared or radio signal to then effect the desired movement of the lamp.
